

302: THE MAKING OF THE INDIAN SOCIETY FOR QUALITY IN HEALTHCARE

Muslim M.

Objective:

To promote the Quality among the Healthcare professionals and Healthcare organizations in India.

Methods:

- Getting an idea of setting up a National Society for Quality in Healthcare for India.
- Brain storming the idea.
- Initiating a dialogue with the CEO of ISQua.
- Further communications with ISQua.
- Getting the Setting up Guidelines for the Society.
- Reading the guidelines thoroughly.
- Identifying the core healthcare professionals to run the Society.
- Educating the identified persons.
- Developing aims and objectives for the Society.
- Getting the legal documents to setup the society.
- Registering the Society

Results:

The study is a result of setting up of The Society for Quality in Healthcare in India. The study father discusses the bottle necks to establishment of such a society and making progress to start to run the society.

Conclusions:

a. The study/project is more of an example to healthcare individuals or healthcare organizations in other countries, committed to improve quality in healthcare to help them to initiate such society in their countries and promote the Quality in Healthcare for giving better patient care.

b. The project/study has reached its objectives by setting up the Society for Quality in Healthcare in India.

c. New knowledge was gained in terms of knowing the intricacies of setting up a unique forum for dealing with quality of healthcare issues in India which was non-existent before.

The study shall give the Society an impetus to start functioning, grow and develop and the author is expected to provide figures of qualitative and quantitative growth during the conference in Dallas, USA.
